

# **BILLINGS**

## **Arthritis (including RA)**

Summary: Specialty biologics and long-term monitoring can create substantial annual out-of-pocket costs.

Main trigger: Biologics, urgent flares, surgery, and ongoing therapy.

Top actions:

- Today: Ask about biosimilars, assistance programs, and formulary status.
- This week: Review expected annual OOP and refill timing across coverage phases.
- Ongoing: Use function-focused PT and exercise plans to reduce flare-related costs.
